### MELAMINE

Revenue derived from the sales of melamine decreased by approximately RMB51 million or 14% from RMB368 million for 1H2019 to approximately RMB317 million for 1H2020. The decrease was due mainly to a decrease in the average selling price of melamine by 15% YoY which was largely the result of the weakened demand in domestic chemical products and the negative impact from the outbreak of COVID-19.

## METHANOL

Gross profit margin of methanol of the Group decreased to approximately negative 2.3% for 1H2020 from approximately 4.3% for 1H2019. This was due mainly to the weakened international energy prices which in turn caused the drop in the average selling price of methanol by approximately 35% and such drop was greater than the drop in the average production cost (purchase price of coal) of methanol.

## (V) 5

The domestic and international economic environment has become more complex and volatile recently. Not to mention the continued weakness of international energy prices and the impact of the COVID-19 epidemic. All of these have led to a reduction in the prices of the Group's major chemical products such as methanol, dimethyl ether and melamine. With the domestic epidemic generally under control and the arrival of the winter peak season for the sales of chemical products in the second half of the year, it is expected that the market demand for the Group's major chemical products will gradually recover.

The market integration in the domestic urea industry has been accelerating. The Group expects that the supply and demand of urea products will maintain a tight balance to provide support for domestic urea prices. At the same time, domestic land re-cultivation and land transfer policies are being implemented steadily, which is expected to further promote the modernization of China's agriculture industry. The shortage of food supply in some overseas regions and the increase in domestic food prices as a result of the epidemic will further stimulate the market's demand for high-efficient fertilisers. The Group will also take this opportunity to further advance its product differentiation strategy and strengthen the research and promotion of high-efficient fertilisers, thereby enhancing the Group's profitability and market competitiveness.

In terms of project construction, the Group's Xinxiang production plant relocation project and the Jiangxi base construction project are proceeding as scheduled. The Xinxiang production plant relocation project is expected to be completed and put into production in the third quarter, and the Jiangxi base construction project is expected to be completed and put into production in the fourth quarter. The Group will continue to optimize its production layout and improve its production efficiency.
